

Conserving Water

More and more people need clean drinking water, but there isn't enough. You can reduce water use and share with others. Wasting water will make it very expensive for everyone to buy.

Using too much water dries up streams, rivers, and lakes. Wildlife needs fresh water to drink just like you and me. Where will the fish live without water in their rivers? You can help by taking short showers - about 5 minutes.

Only wash your car if it's really dirty, or go to a car wash that recycles the wash water. Wash dishes and clothes on a full load, not just half full. Do you have an irrigation system? Be sure it only comes on in the early morning before
